

## ANNOUNCING TRENCHLESS MIDDLE EAST 2017

TRENCHLESS MIDDLE EAST 2017 is the tenth in the successful series of trenchless technology shows and is to be held once again at the Jumeirah Beach Conference Centre, Dubai, 13-14 March 2017.

Exhibition space is already at a premium with companies looking to capitalise on the booming construction market which is bringing new demand for new infrastructure installation, as well as refurbishment of urban installations.

Sponsorship has also been confirmed by many prominent industry suppliers including Herrenknecht, International Aramoon Corporation and Vermeer.

A conference programme will complement the exhibition and will be tailored to appeal to delegates from the major municipalities, road traffic departments and water companies. Keynote speakers will present case studies of many major projects in the region.

Case study presentations will also be included from several international suppliers who will illustrate the capabilities of equipment in a variety of geotechnical conditions both in the Middle East and other locations around the world. Potential authors are invited to submit proposals for papers before **30 November 2016** to the organisers.

TRENCHLESS MIDDLE EAST 2017 is supported by the International Society for Trenchless Technology (ISTT). Organisers are UK based Westrade Group Ltd who are specialists in organising No-Dig and Trenchless events in many overseas locations, including the Middle East, South East Asia, India, China, South Africa and Europe.

Further Information may be obtained from Westrade by emailing [trenchless@westrade.co.uk](mailto:trenchless@westrade.co.uk).
